FEBRUARY RESULTS OF FIVE-YEAR PLAN;  
LABOR PRODUCTIVITY BELOW PLANNED LEVEL

## FEBRUARY PLAN IN SLOVAKIA -- Pravda, No 61, 13 Mar 49

The Five-Year Plan for February was fulfilled in Slovakia by 105.5 percent, as against 102.6 percent in January.

The individual industries fulfilled their plans as follows (in percent): metallurgy 121.5, ceramics 120.2, glass 117.2, textiles 109.3, chemical industry 108.7, leather and rubber 101.8, mining 100.3, cellulose 107.6, wood 100.4, and metal industry 99.9.

The Kovosmalt metal-enameling plant at Matejovce fulfilled only 71 percent of the plan. The reason given was the same one given in the two-year plan: repairs on the tunnel furnace.

All 14 plants of the iron-mining industry exceeded the plan.

The Kraj National Committee in Kosice decided on the basis of the February results to send its directors into every plant which does not fulfill its plan. These directors will determine the cause of the poor production and will try to remedy it.

The production of black coal in February fell below the plan as a result of the Doubrawa tragedy. The brown-coal output was reduced by the bad showing of the Slovak mines.

In Slovakia alone the plan was fulfilled 105.5 percent, compared with 102.6 percent in January. Mining, metallurgy, ceramics, glass, textiles, and the chemical industry showed the best results. Electric-power production fell off as a result of the shortage of water.

The various industries of the whole Republic fulfilled the plan as follows (in percent):

<u>Industry</u>	<u>Feb</u>	<u>Jan and Feb</u>
Mining	100.6	100.1
